

Take control of your security!

Innovative security products from the Van Lock Company

Traditional padlocks and locks used in the utility environment create massive security vulnerabilities. Either they inherently lack the features to provide effective key control or the system, over time, has lost control of keys. It's time to make a change! Van Lock can help!

- Brass Padlocks
- Steel Hockey Puck Locks
- Barrel Locks/Meter Locks
- Locking Key Rings
- Lockout-Tagout Padlocks

No exposed keyway
Flat face design

Unique and Registered Codes

The locks and keys you receive will be uniquely yours and those codes will be strictly controlled.

Proprietary Lock & Key Design

Our keys are hand assembled at our factory. Employees and contractors will no longer have the ability to get unauthorized duplicates made at locksmiths or hardware stores. Additionally, keys can be serialized for additional tracking and auditing purposes.

8-in-1 Change Feature

Locks have the option to use our Vanamatic feature. This means that 8 unique codes are pre-set into the locks. Eliminates the need for expensive re-keys if a key is lost, stolen, or otherwise compromised. Simply change the setting of the lock to a new code, issue new keys, and the lost key is locked out of the system.

Made in the USA

Our products have been made in our Cincinnati, Ohio facility since 1959. Our dedication to quality and your security is unmatched.
